PROFESSIONAL SUMMARY

Information Science Engineering student skilled in Java, Python, C++, Go, and full-stack web development. Experienced in building AI/ML threat detection platforms, cloud backend services, and machine learning models. Strong foundation in core Computer Science principles, REST APIs, and database architecture.

EDUCATION

RV Institute of Technology and Management (RVITM)

Bachelor of Engineering in Information Science Engineering

CGPA: 8.4

2024 – 2028

Bengaluru, India

TECHNICAL SKILLS

- **Languages:** Java, C++, Python, Go, JavaScript, SQL, HTML5/CSS3
- **Machine Learning & AI:** Natural Language Processing (NLP), Scikit-learn, Pandas, NumPy, Rapid-Fuzz
- **Web & Frameworks:** FastAPI, React, Node.js, Vite, Tailwind CSS, RESTful APIs
- **Cloud, Tools & Databases:** AWS, Docker, Git, Postman, MongoDB, MySQL, Linux/WSL
- **Core CS Fundamentals:** Data Structures & Algorithms, Object-Oriented Programming (OOP), Operating Systems (OS), Database Management Systems (DBMS), Computer Networks (CN)

PROJECTS

Sentinel-AI: Threat Detection & Forensics Platform

Oct 2026

- Developed an asynchronous web platform utilizing Python and FastAPI to automate email threat analysis and digital forensics investigations.
- Engineered RESTful API endpoints (`/api/investigations`) to parse security telemetry, track incident status, and serve real-time investigation metrics.
- Built a responsive dashboard with HTML, CSS, and JavaScript to visualize security threats and streamline incident response workflows.

Full-Stack Cloud Manager

Aug 2026

- Developed a high-performance backend service in Go, leveraging worker threads for concurrent processing and MySQL for reliable persistence.
- Designed a responsive dashboard utilizing React, Vite, and Tailwind CSS to manage cloud resources seamlessly.

ML-driven Psychographic Credit Profiling

Nov 2024

- Built an ML scoring model utilizing behavioral and transactional data (mobile money, digital wallet activity) to evaluate credit risk.
- Implemented document-less profiling using community validation mechanisms (ROSCAs/SHGs) for underbanked populations.
